Yes. I will finish up Kampachi and was made the contact person on the forthcoming public hearing notice, however, she will continue working on it until her final day.

Good for her! I guess this means she won't be finalizing the Kampachi permit...will that be back to you?

Please join me in celebrating Meghan's career at EPA, she has informed us that she has accepted a position with the CDC. Starting in January, Meghan will be using her engineering talents to work on facilities management at their Atlanta offices. I am sure that all of you are just as aware, as I am, that Meghan's contributions to our organization and our mission are of great significance. And it's not just her work in industrial permitting that will be missed- as many of you know, Meghan volunteers for everything related to federal service. Our returned Peace Corps staff are truly special leaders, and I hope that you will join me in wishing Meghan the best for her future endeavors. While it saddens me to

see someone so important to our operations leave, it also, as a citizen, gives me great comfort to know that our government will be well-served by Meghan at the CDC.

I will be managing the transition of her projects and duties over the next month, and I do not have any information, as yet, regarding back-filling this position.

Look for an invitation to our Section to join Meghan for a celebration luncheon on December 18- forthcoming.

Craig Hesterlee, Chief
NPDES Permitting Section
EPA Region IV Water Division
